# Sustainable adaptation of typical EU farming systems to climate change

Eha Kruus, EMU

# *Towards evidence-based and sustainable adaptation action plans for European farms*

- To test 120 farms in all 4 EU climate risk areas of 3 most important farming systems **livestock, arable and permanent crops;**
- Continuous interaction with farmers and extension services;
- Contribute to ensuring that the results reach as many farmers as possible;
- Create practical results and recommendations on how to further integrate adaptation into the CAP.
